

# Provision Newsletter

This half term's topic is:

'Under the Ocean'

## Key Words

Sea, fish, water, world, float, sink, pull, push, donate, money, charity

## Community Engagement

We'll be enjoying our usual opportunities plus visiting different charity shops and various ponds and canals (with extra safety in mind) hopefully we'll see a few ducks to feed. Yellow Class will enjoy a weekly visit to Forest School.

## Science

We will be exploring a different kind of push and pull—floating and sinking. We will introduce the idea of water resistance, there's going to be lots of predictions and experimenting.

## Humanities

This term is geography based— water and earthquakes. We'll learn about the water cycle and different places we find water.

Hopefully we won't have an actual earthquake to experience but we'll try to recreate something on a smaller scale.

## Technology/Art

Food Technology: we'll be making a range of foods that we can sell to raise funds for our chosen World Charities.

Art: Our focus will be mixed media to include wax resist. We will be doing a joint project along with computing and hope to have an ocean themed 'installation' by the end of the topic.

## PSHE

Our focus is World Charity fund raising. After investigating what different World Charities do and deciding which ones to support, we'll try to find one of their charity shops to visit. Then we'll be taking orders for different crafts we'll be making to raise some money for them .

## Home learning

Why not have a good sort out of some of your old toys, books and clothes and take them to a charity shop? While you're there see if you can find something to re-fill your cupboards!!

Visit some places to look at different types of water—but don't fall in!! What can you see?

Make a paper boat and see if it floats next time you have a bath

We are keen to hear about how pupils engage with each topic at home. Please send notes and photographs into school
