

**Pens Meadow School
COVID-19 Risk Assessment
effective from 11th January 2022**

In the SEND and specialist settings: additional COVID-19 operational guidance, from 2nd January 2022, the Introduction section reads:

“The government continues to manage the risk of serious illness from the spread of the virus. The Prime Minister announced on 27 November the temporary introduction of new measures as a result of the Omicron variant (B.1.1.529) and on 8 December that Plan B, set out in the autumn and winter plan 2021, was being enacted. As a result, these measures are reflected in this guidance for specialist settings. This advice remains subject to change as the situation develops.

Coronavirus COVID-19 continues to be a virus that we learn to live with and the imperative to reduce the disruption to children and young people’s education remains.

Our priority is for you to deliver face-to-face, high-quality education to all pupils and students. The evidence is clear that being out of education causes significant harm to educational attainment, life chances, mental and physical health, and presents safeguarding risks.

We have worked closely with the Department of Health and Social Care (DHSC) and UKSHA to revise this guidance.”

This version of Covid-19 Risk Assessment’s purpose is to establish mitigating factors to the spread of the coronavirus.

It is considered a working document and will be reviewed in line with the Government Guidelines. Staff will be informed of the changes and latest copy will be saved on the school website.

It must be read and adhered to by all staff and visitors.

It should be read in conjunction with all other school’s policies and procedures.

Covid-19 Risk Assessment takes into consideration following publications:

[Mass asymptomatic testing in specialist settings](#)

[Special schools and other specialist settings: coronavirus \(COVID-19\)](#)

[Actions for schools during the coronavirus outbreak](#)

Further advice can be found in Appendix 1.
